Nature has an ecological system that must be managed by all of human beings. Unfortunately, people are careless about their duties which then causes many environmental destructions. This research deals with man's efforts to save thesitas nature as reflected by Jake Sully, the main character of Avatar movie. Avatar tells about a place in outer space named Pandora, it is a spot of unobtanium, grey rocks cost twenty million dollars/kg. There is a group of people who want to destroy Pandora to get the unobtanium. Because of that reason, the aim of this research is to reveal Jake Sully's efforts to save the nature. The theoretical framework is Sillas derrived from the idea of ecocriticism.

In conducting this research, there are three steps taken as the methodology. First is deciding object material, Avatar movie. Second is analyzing and Univers interpreting the texts. The material object will be analyzed by enclosing the screen capture and the script or dialogue related to the topic of discussion. The last is stars drawing the conclusion.

This research finds that the destruction of Pandora happens because of humans' greed. People destroy the nature to get their purposes which causes many negative impacts, because Jake Sully falls in love with Pandora, it becomes his reason to do some efforts. There are Jake Sully's efforts to preserve Pandora such as betraying sites Brawllay Universi the mission, preventing the military agression by stopping the tractors which it as Brawijava damage the trees, and leads the war against military agression.

In conclusion, Jake Sully has become an agent of change to create a better world by preserving Pandora from humans' greed. He is aware that man and nature should live in harmony. Alam memiliki sistem ekologi yang harus dijaga oleh semua makhluk hidup. Si Sayangnya, manusia lalai akan tugasnya sehingga banyak kerusakan lingkungan sitas yang terjadi akibat ulahnya. Penelitian ini berkaitan dengan usaha manusia untuksitas menyelamatkan alam seperti yang tercermin dalam diri Jake Sully, tokoh utama dalam film Avatar. Avatar menceritakan tentang sebuah tempat di luar angkasa bernama Pandora yang merupakan sumber dari unobtanium, batu abu-abu yang memiliki harga dua puluh milyar dolar per kilogram. Ada sekelompok orang yang sitas Brawijaya ingin menghancurkan Pandora untuk mendapatkan unobtanium tersebut. Karenasitas Br alasan tersebut, penelitian ini bertujuan untuk membedah usaha-usaha apa saja yang dilakukan oleh manusia yang tercermin dalam diri Jake Sully untuk menyelamatkan alam. Kerangka teori yang digunakan untuk menganalisis film ini Universi adalah ekokritisisme.

Dalam penelitian ini ada tiga tahapan metode penelitian. Yang pertama ialah sitas menentukan objek penelitian, yaitu film Avatar. Kedua ialah menganalisis dan menginterpretasikan teks, lalu objek penelitian akan dianalisis dengan menyertakan potongan gambar dan naskah atau dialog. Yang terakhir ialah menuliskan kesimpulan.

bahwa kehancuran Pandora terjadi Jakibatsitas Br UniversitasPenelitian ini menemukan keserakahan manusia. Manusia melakukan beberapa tindakan dengan cara merusak alam untuk memenuhi tujuannya sehingga menyebabkan banyak dampak negatif, karena Jake Sully jatuh cinta kepada Pandora, itulah yang membuat ia melakukan beberapa usaha untuk menyelamatkan Pandora. Berikut ini adalah sitas Brawijaya Universi usaha-usaha yang timbul dari diri Jake Sully seperti mengubah misinya, sitas Brawijaya Universi mencegah agresi militer, dan memimpin peperangan melawan agresi militer. niversitas Br Kesimpulannya, Jake Sully telah menjadi agen perubahan untuk menciptakan dunia yang lebih baik dengan cara menyelamatkan Pandora dari keserakahan manusia. Universitas Brawijaya Universita INTRODUCTIONersitas Brawijava Universitas Brawijaya Universitas Brawijaya Universitas This chapter presents the introduction of the research which covers background sitas Brawijava Universitivill conduct this research to the next chapter. **Universitas Braw** Universit1.1 Background of the Study

of the study, problem of the study, and objective of the study. Those sub chapters TAS BRAH, God creates beautiful nature as His first masterpiece. God creates human to control and take care of the nature because it has such ecological system that must Universitive managed by all of human being as plants, animals, and human. If one of themsitas Brawijaya extincts, the ecological system will not be balanced. Rapoport (1969) says that the Universit role of man is very important toward the nature conservation. It means that man's Sitas Brawijaya Universitattitude toward the nature decides the continuity of nature. Sometimes, however, sitas Brawijava people are careless about their duties in this world. Nowadays, there are such Universit crucial environmental issues as global warming, extreme weather, flood, and sitas Brawijaya Universitavalanche because of the degree of nature destruction is getting worse. Anup Shahsitas B (2012) strenghtens that "Rapid global warming can affect an ecosystems chances" Universi to adapt naturally. The Arctic is very sensitive to climate change and alreadysitas Brawijava Universitas Brawijaya Universitas There are such environmental issues happen over this world, for example: the Brawlay global warming, extreme weather, flood, and avalanche, as Kriegle (2007, para. 1) Universitas Brawijaya Universitas Brawijaya

Universitas Brawijaya Universitas Brawijaya **Universitas Brawijaya**  Universitas Brawijaya **Universitas Brawijava** Universitas Brawijaya Universitas Brawijaya Universit defined that the main cause of global warming is the big amount of carbon dioxide Universitas Brawijaya Universitas Brawijaya Universi that is released into the atmosphere by such human activities as industrial, farming, and deforestation activities. The pollution that is caused by human's Universitactivities will make Global warming is caused by the increase of greenhouses as Br Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas B Iniversi gasses, carbon dioxide, and methane. Those are the natural phenomena caused by sitas B human. Initially, global warming is considered as a trivial issue without any real s Brawijava Univers Universitform of action to repair the damage of nature. Unconsciously, there are manys impacts from it. One of the examples is the extreme weather, as Edvin Aldrian (2010) warned that super-extreme level for the first time in the history, and this is much worse than in 1998, when La Nina caused extreme weather in the country. Idrus and Afrizal, 2013 in The Jakarta Post. p.5 reported that "floodwaters up to 2 versimeters deep, have forced arround 600 villagers of Air Bahoy hamlet in Sangadesa district. Musi Banyuasin regency, South Sumatra, to flee from their homes as rivers overflowed in the last two weeks." This fact strenghtens that there are many disasters happened in the environment. Avalanche also happened in Indonesia several times ago In The global news community (2013), it is stated that children Universitwere evacuated from their homes were submerged in water, when Manado, hit bysitas Bra floods and landslides, on Sunday, February 17, 2013. There were more than 17<sub>sitas</sub> people dead landslides. This incident was caused by the rain which fell for two Universitas Brawijaya Universitas Brawijaya Universitdays without stopping versitas Brawijaya Universitas Brawijaya Universitas Bra Universitians All of that natural disasters sometimes are caused by human's action who do Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya not care about the wholeness of nature and try to dig the richness of nature excessively; for example, flood can happen because many people like to throw the Universitas Brawijaya Universitas Brawijaya

Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya **Universitas Brawijava** Universitas Brawijaya Universit rubbish in wrong places. Another example is many people who throw the rubbish Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Universito the river, so the river becomes full of rubbish so then the river waters it as overflowed into the streets. As stated by Suhendar (2012), "The problem is public Universitawareness for not littering is still lacking. Dizzy I take care of garbage piled up onsitas Brawij Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijay Universithe bridge Dayeuhkolot, because a lot of people who throw litter on the bridge." UniversitAvalanche can also happen because of the illegal logging. Many people do illegal stas Braw s Brawijava Universi Universi logging without thinking about the negative impacts as said by Frisella (2011, sites) para. 3) "The infertile forest happens when humans do illegal logging." From the previous statement, it can be inffered that illegal logging becomes the trigger of Universi avalanche because the soil cannot become solid without tree roots and it can easily sin damage the environment. All of the problems above portrays the destructions of Universitnature. Universita Issues of the environment are now portrayed in some movies. There are many<sup>SITAS</sup> Universimovies reflected the environmental issues, such as Wall-E, The Day After University Tomorrow, SpongeBob Squarepants, Avatar and many more. This is because Universit movie is one of the most effective tools to deliver messages or to discuss manysitas Brawijaya ya Universitas issues that happen in the society Movies also have a big power to influence the audience because through movie, serious problems can be packed in a simpler Brawlay ersites Brawlay Universitival way without omitting the messages. Summerfield (2004), moreover, says that "asitas Br Universitas Brawijava Universitas Brawijava Universitas Brawijava Universitas film can speak and evoke emotions, give us permission to talk about sensitive and Universit controversial issues; create common basis for discussion." Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya As one of the fiction movies that present environmental issues, Avatar tells Universitabout people's greed to take unobtanium, one of the natural wealth in Pandora.sitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya rawijava

Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijava Universitas Brawijava **Universitas Brawijava** Universi Pandora is in the outer space and it becomes a place for American in developing Universitas Brawijaya Universitas Brawijaya Universi their Avatar program. There are groups of people that have some plans to destroys it as Pandora to take the unobtanium, a grey rock with high price. They will sell it in UniversitAmerica to take much money. Jake Sully is one of the beginner marinirs that issitas Br Universitian Brawijaya Universitian Brawijaya Universitian Brawijaya Universitian B Universitian by military people to go to Pandora, the area of Na'vi which is the spot of sites B Universitunobtanium. Pandora is a forest that is rich of natural wealth. The life in Pandora Universitis harmonious, there is a good relationship between human and nature. Thesitas animals and plants got along with the Na'vi. Jake Sully is trapped in Pandora at his first time he visits Pandora, which is the beginning of his journey. In Pandora, Universi there are some trees and one of them is a tree of Eywa, god of the Na'vi. In the beginning, Sully does the duties from the head of the military. He studies all of Universi activities in Pandora, he learns how to be a good friend of Na'vi. Unconsciously,S he falls in love with the forest and its inhabitants then he decides to struggle to Universit maintain the forest along with the Na'vi. Finally, he wins the battle and becomes Universitone of the avatars forever. Universitas Thus, it can be seen that Avatar movie presents issues on environments. Thesitas writer chooses Avatar movie to study because the issue of greedy people in the natural snatch is clearly illustrated by the director of the film. That is one of the Universi environmental issues in our environment nowadays. People try to get more money, regardless the destruction of nature. Those things cause many natural Universi disasters happen in our environment. Universitas Brawijaya Universit<sub>2</sub>s **Theoretical Framework** 2.1.1 **Ecocriticism** As a separate movement or school of literary criticism, ecocriticism started sitas Brawijava developing in he 1990s. Tosic (2006, p. 43) says that in the beginning, it was a Universit meeting place of American critics dealing exclusively with American literature. Sitas Brawijaya Ecocriticism is derived from the words 'eco' and 'criticism'. Tosic (2006, p. 44) claimed that 'eco' is from'ecology', which is concerned on the relationships Universit between living organisms in their natural environment. The criticism departs from sitas people's concern with the relationships between literature and environment or Universithow man's relationships with his physical environment are mostly reflected in the sitas Brawijaya Universi literature. The main interest on this criticism can be explained in two ways: (1)sitas Brawijava man always exists withinsome natural environment, there cannot be is without rawijaya Universitwhere(Buell, 1991, p. 1091), (2) Survival of the earth, the greatest problem, sitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya became obvious in the twenty first century. Man is a life-long wanderer and always identified with physical and cultural environment. Man also feels University vitally threatened in the ecologically degraded world. Deep ecology emphasizes the role of the individualas a citizen of the Universit World and Earth to take a responsibility. It is important to see that this philosophysical involves allthe aspects of human life andthought. This is the summary of Deep Ecology principles formulated by ArneNaess and George Sessions (1984): Universit1) The well-being and flourishing of non-human life on Earth have value in themselves, independent of the usefulness of the non-human world for human Universitaspurposes. 2) Richness and diversity of life-forms contribute to the realization of these values and are also values in themselves. Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijava Universitas Brawijava Universitas Brawijaya 4) The flourishing of human life and cultures is compatible with a substantial ersitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas decrease of the human population. The flourishing of non-human life requires it as Brawijava Universitas Brawijaya University) Present human interference with the non-human world is excessive, and thesitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya situationis rapidly worsening. Universitas Brawijaya Universitas Brawijaya Universit6) Policies must therefore be changed. These policies affect basic sitas Brawijaya Universitaseconomic, technological and ideological structures. The resulting state of affairs it as BRAW, would be Universitas deeply different from the present. Universi 7) The ideological change is mainly that of appreciating life qualityrather than adheringto an increasingly higher standard of living. Universi 8) Those who subscribe to the foregoing points have an obligation either directlysitas orindirectly to try to implement the necessary changes. Universit From these eight statements, this research will use the following numbers: (1) The Universi well-being and flourishing of non-human life on Earth have value in themselves, independent of the usefulness of the non-human world for human Universit purposes. This statement will use to sitas Br analyze that the ideological change needed by military people in Avatarto s Brawijaya Universitas Universitappreciate the life of the living things in Pandora and it starts from Jake Sully'ssitas ideology. environmental imagination appear from the physical Universi environment. Alan Gilpin (1994, p. 74) defines the physical environment as including "The built environment, the natural environment, and all natural Universi resources, including air, land and water." The physical environment has a sitas relationship with human as the inhabitant, so how one feels about that Universitenvironment is an equally important fact. Lawrence Buell (1986) says that sitas Brawijaya Universit"Environmental imaginationreferring to how the physical environment shapes imagination."It means that what happened with the physical environment Universitinfluences human's imagination. So, it is necessary to question or change one'ssitas Braw attitudes tonature and all the other living beings to create reimagination. The third element as Tosic (2006) claimed that the term global Universitas Bra Universi environmental culturedenotes the ultimate broadening of one's insights and itsitas finally leads to environmental unconsciousnessin which the concerns for anywhere in the world becomes crucial. This phenomena iscaused by man's Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universi activities as one of the reasons. As Tosic's (2006) opinion that man israrely Universitas Brawijaya Universitas Brawijaya

Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya satisfied with the satisfaction of his vital needs, immoderate economic schemes Universitas Universi and constant economic growth are the reasonwhy man often destroys the world insites which he lives. So, because of that reason, ecocriticism appears as an agent of Universit change in general globalization in the world. Universitas Brawijaya Universitas Br Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Br Universitas Brawijaya Iniversitas Brawijaya Rubitat. Man is different from other living Universit beings, plants and animals can directly be endangered by the change of habitat. UniversitTosic (2006, p. 48) found that another important cause of extinction is habitating modification. The changed attitudetowards soil involving the greater use of Universit chemical causes the extinction of numerous species. Based on Jones' (1990) Site Universi statement that "for everyone species which becomes extinct, approximately 30 sites B other dependent species move into the 'at risk' category." These facts have led to Universi theattempt at preserving the endangered species and establishing the protected areas. However, actions must be much broader and the whole society and all the Universit individualsmust be changed. The last is about toxic discourse, literary hazards, or language pollution. Talking about three things above is related to pollution or polluting that cannot be Universitavoided in any talk about man's environment today.Like Tosic (2006, p. 49)sitas Brawijaya claimed that "hazardous waste and toxic substances discharges give rise to the changes in the biosphere which are "reflected in the impaired performance, Universi reduced growth, lowered reproductive capacity and ultimately the death of sitas Brawijava ersitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya individual organisms"." ersitas Brawijaya Universitas Brawijaya Universitas Brawijaya iiversitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Br From all of the description above, this research will focus on the Universi discussion of deep ecology, environmental imagination and reimagination, global Universitas Brawijaya Universitas Brawijaya

Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya rawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijava Universite environmental culture and environment unconscious, and pollution because they Universitate the fundamental theories that will be used in the next chapter. From the Ecocriticism theory above, it can be concluded that man is always related to the rawijaya Universitenvironment and they cannot be separated from environment because actually it as Brawijava Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya they complete each other. Universitas Brawijava rawijava Universitas Br Nature includes the living things inside like plants, animals, and human sitas Brawijaya UniversitNature is very rich, there are so many natural wealth inside the nature and it issitas Br strenghtened by the statement from Ralph Waldo Emerson (1803), "Nothing is Universi rich but the inexhaustible wealth of nature. She shows us only surfaces, but she issitas a million fathoms deep."Nature is created as an endorser of humans life and all of rawijava Universithe living creatures. Humans, animals, and plants are three components that Sitas cannot be separated from nature. They are completing each other and make the ecosystem balanced. As Marx (1844, p. 158) says that humans live in the nature, Universitnature is as their body, people must keep the relationship with the nature if theysitas do not want to die. As physical and mental, humans are connected with nature where human is a part of nature. Universitas Br Here, human is God's highest creature than plants and animals becauses it as Brawijava humans have common sense and power to manage the nature.God commanded humans to take care about the nature, people were created to be the lords over the Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas animals and plants. Based on the environmental ethics principles, humans must respect the nature because human is a part of nature. Human is called to takes Universi careof the nature for the benefit for each other. Jefferson (1803) strenghtens that sitas Brawijaya Universitas Brawijaya Universitas Brawijaya rawijava

Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya **Universitas Brawijava** Universitas Brawijaya Universitas Brawijaya nature and humans need each other to be beneficial. Humans also need both Universi animals and plants. Human need animals to help their works, for example farmers need cows to plow up the farm. Plants are needed to make the air circulation rawijaya Universi balanced. Forests are parts of nature because they are places for the natural sites Bra wealth, woods, water, and etc. **Forests and Their Function** rsitas Br Forests are essential to the Earth. The existence of forests give bigsitas Brawijaya Universitinfluences to the continuity of world's life, so humans must keep the forest conservation. As stated in Forest Stewardship Council(1993)that "People should Universi obey the rules of forest conservation such as keep the clean air and water, protectsitas all of the forest's components."In the forests, the balance of ecosystem process happens naturaly.World Wide Fund (1990) has a mission to build a future in<sup>S</sup> which humans live in harmony with nature by conserving the world's biological diversity andensuring that the use of renewable natural resources is sustainable. ersi The forest can deliver the functions of protection or conservation expected from it only if it is either in its natural state and under good natural ecological conditions or, when in use, it is managed in a sustainable manner. Gootle and Senne (1997) Universi says that "Health and vitality of forests are very important. The health of forests sitas Brawijava Universitas Brawijava Universitas is fundamental to many of their environmental functions." Brawijaya Universitas Brawijaya 2.1.4 Technology Universitas Brawijaya Universitas Brawijaya Universitas Brawijava Universitas Brawijava Universitas Bratechnology exists because of human's necessity. Human from the pastsitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Universitas proceed together with the development of era and produce a tool that was known sitas Universitas technology. Technology can be said as the ideas or abilities that is poured into as Brawijava Universit Universi real object and it is operated by human. Machines can be defined asone of thekindsitas of technology like Salim (1985, p. 2015) said,"Technology is a branch of Universitas Universit knowledge that have relationship with buildings industry, machines, and etcetera." Universi According to Sudarsono (1993, p. 216), technology is a science about the building of industrial affairs. Technology as the application of human's ability have so Universitmany functions. Beside to make all things walks simpler, technology was created to help Universita Universithe development era. People are demanded to be more creative and creates sositas Universimany new things. According to Alisyahbana in Miarso (2007, p. 131), technology is a way to do something to fullfill human necessity with the help of tool and Universitintelligence, so it will makes part of the body, the five senses, and human's brain wiiava Universitas B stronger. Technology is a tool that can help human to make every thing works simpler. Miarso (2007, p. 62) strenghtens that "technology is a process to increase Universi the added value, that process use or produce a product, ... "Technology makes onesitas Conversition Brawley a progression so that country can compete in this globalization era because technology always develops to be more modern and more sophisticated. Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya rawijava

Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya **Universitas Brawijava** Universitas Brawijaya Universitas Br Technology can be seen from the ecological framework, so, by the Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Universi development of technology, it creates so many sophisticated machines to helpsitas people in preservingnature. Based on Mosher's (1965) opinion, agriculture is one Universit of the important aspects in life. The development of technology encouragesitas Bra Universitas Brawijaya Braw process. Therefore, technology is created to make the existence of nature better as Brawijaya Universitas Universi than before. Angga (2013) says that agriculture tools develop from the level of sites planting process become a modern machine which can cultivate the broader land. There are many products of technology in agricultural field, for examples: Universi tractors, sprayer machines, plowing machines, production machines, lawn mower, and etcetera. For the application, that tools help the farmers cultivate their farms. UniversitThe tractor is used to plow the farm. The farmers usually use the cows to helpsitas them plowing their farm, tractor is more productive than cows. A sprayer machine Universitis used to fertilize the farm, so, if usually the farmer fertilize their land manually sitas Brawijaya Universitiand it needs a long time, by the help of the machine it can makes a farmer does the work easier in a short time. A production machine is used to produce good Universi harvests, if people usually classify the harvests manually, technology makes themsitas Bra work easily. Lawn mower is used to cuts the grass, that machine helps people to work easier than before. rsitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Bratechnology also has negative side. Technology is dangerous if people dositas Brawijay not use it as well as their function. Technology can destroy the living creatures. Technology can cause negative effect to the world. ## 2.1.6 **Man-Environment Field**

Amos Rapoport (1969) will explain about the relationship between human Sitas Brawijaya Universi and the environment. Rapoport(1969) believes that models of man view of the strass field has three different components, they are the mechanistic model of man, the Universit perceptual-cognitive-motivational model of man, the behavioral model of man, sitas Brawijaya Universi and a social systems, ecological model of man. This research will use a social stras Br systems, ecological model of man because it is related to the problem of the study ersitas Brawijava Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitofs this vresearch. UAv centrals theme junderlyinge this a model visa that humansitas Brawijava interpersonal behavior is part of a complex ecosystem which has several features. In this part, there are some sub parts and this research will use one of them, that is Brawijaya Universimutual and dual impact between man and his environment. Brawijava Universitas Brawijaya Universitas Brawijaya

Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universities Brothere is a mutual and dual impact between man and his environment. Not Universi only does the environment act upon men, but man acts on environments, in a trues ecological sense. Thus, one often encounters the view that environments must be Universide designed for people to be placed in, to fulfil their needs and to satisfy their tas Brawlay Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya purposes. Here, man becomes an environmental change agent, not merely a Universit recipient of environmental influences. Furthermore, according to this approach, sites s Brawiiava Univers Universithe environment becomes an extension of man's being and personality.sit Rapoport(1969) says that Concepts such as territory (the use and possession of places), privacy (control of input from others) and personal space (spatial Universi distances from others) all refer to an active, coping use of the environment by people, not merely reactive responses to environmental stimuli. Universit2.1.6.1 Humans' Efforts to Preserve Nature People do so many efforts to reach their purposes and they have reasons in every effort, good or bad reason. In ecological framework, there are some reasons Universifrom the efforts done by people, such as the destruction of nature and thesitas unbalanced nature that are caused by humans action.Extreme weather that is caused by the degradation of forest's function, flood that is caused by illegal Univers Universi logging, air and water pollution, and many more. There are some purposes also it as reached by people from their efforts, to create the stabilization and beautiful nature. The efforts to preserve the nature are explained in Indonesia Constitution Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya number 23 (1997), the conservation of nature means the efforts to protect all of the living things in the nature to creates the better world.

Universitas Brawijaya Universitas Br Some efforts are needed to reach people's purposes, for examples: soil and Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Universitair preservation, animals protection, stop the poaching and illegal logging, stopsitas the forest fire, support the afforestation, and many more. The ideological change Universitis the first important thing to do by people, after that people will do their efforts tositas Br Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Br Universi save the nature. Naess and Sessions (1984) strenghten that the ideological change sitas Br to creates better life quality is needed by all the people in the world. Burnam Universit(1987) said that the Aboriginals get succesfull in conservation campaign because sites they chose to become part of environment rather than to destroy it in the name of progress. Here, the term "green movement" refers to organized attempts by Sitas Br Universitation of the second s relationship between human beings and nature. Miranda Schreurs and Elim Universi Papadakis (2009) found that Individuals, groups, and organizationssitas begancampaigning for the conservation and preservation of natural areasand the Universit protection of wildlife species. The efforts to preserve nature should starts from sitas Brawijaya Universi individuals consciousness then it will spread to the large community. Susilositas (2012) said that some action as efforts as an active resistance to preserve the Universitnature is necessary. If so many actions in preserving nature is neglected bysitas Brawijaya people, there are some actions needed to against that deviation. Universitas Brawijaya Universit ersitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya 2.1.6.2 Humans' Greed Universitian Breveryone has their own standardto fullfil their daily needs. Based on the sitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya ecological framework, greed means take the natural resources excessively. There are constitutions that organize the use of natural resources, but people usually take Universi the natural resources excessively to reach their purposes. It presents the finding of the sitas Brawijaya Universit research and the discussion of the research's findings. This chapter consists of two as Brawiiava Universitas Braw Universitsub chapters, the first is the destruction of Pandora and then Jake Sully's efforts insitas preserving Pandora. There is no action without trigger, so the destruction of Pandora becomes a trigger for Jake Sully to preserve Pandora. Pandora is in the outerspace. Pandora becomes a place for Americans in developing their Avatar program. Jake Sully is chosen to replace his brother's Universit position, his job is acting as the tall blue creature like the Na'vi, the indigenous it as Brawijaya rawijava people there. Their posture is higher than usual human. Their weapon is arrows Universithat dipped in a neurotoxin which can stop humans' heart in one minute. Humansitas Brawijaya Universimeeds to use a filter mask there because the atmosphere of Pandora is differentsitas from earth's atmosphere, so, without the filter mask they will die. People know Universithat Pandora contains of natural wealth, unobtanium, which is very expensive. Itsitas Brawijaya becomes a reason for people to take control over Pandora and expel the Na'vi to get the unobtanium. ersitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universit<u>3.1</u> Bradestruction of Pandora Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas BraHuman cannot be separated from nature as Buell (1991, p. 1091) says that itas Brawijaya man always exists within some natural environment, there cannot be is without Universitwhere. It means that human and environment have an absolute relationship. Universitas Brawijaya Universitas Brawijava Universi cannot be man without environment. However, people are careless about their Universitas Brawijaya Universitas Brawijaya Universit Universi environment and they do not appreciate the existence of nature which cause manysitas as Brawijaya Universitas Brawijaya Universitas Brawijaya kinds of the destruction of nature. s Brawijava Universitas Brawijava – Universitas Brawijava Universitas Brathe destruction of nature often happens in this world because of manysitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Iniversi reasons, mostly, it is related to human, as Naess and Sessions (1984) found that it as Universit"Present human interference with the non-human world is excessive, and the Universi situation is rapidly worsening." Excessive human interference can make the existence of such non-human world as plants, animals, air, water, soil, the organisms, and all of the natural resources become threatened. As reflected in Universi Avatar movie, people destroy Pandora because of the economical reason, with technology as the tools they attack Pandora with three kinds of military agression Universitand there are some negative impacts of that destruction that will be explained in the following sub chapters. Universitas 3.1.1 The Reason Why People Want Pandora Universitas B. Avatar is a program to make a duplicate of someone's body into another appearance through the help of machine. In the process of developing Avatar program, Americans practice their Avatar program in Pandora. There is Universi unobtanium in Pandora which is very expensive. Americans want to takes tas Brawijava Universit Na'vi first to take control over Pandora. Here, unobtanium becomes a reason for American to take control over Pandora. People do something may because of both good and bad reasons. In the destruction of Pandora, there is a group of military Universit who want to grab the unobtanium by destroying Pandora and all the living things it as Brawijaya Universitas Brawijaya Universitas Brawijaya

Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya rawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya inside.As reflected in Avatar movie, the destruction of Pandora happens because ersitas Brawijaya Universi of human's greed, which is caused by economical condition. Tosic (2006) assumes that man is rarely satisfied with the fulfilment of his vital needs. rawijaya Universi Immoderate economic schemes and constant economic growth are the reason whysitas Brawijav Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya man often destroys the world in which he lives. Sometimes, people's income is University smaller than their expense, therefore, human always feels unsatisfied with their Universi condition, and it makes them do many things to fullfil their needs. There are many sit to fullfil people's needs, one of the examples is destroying their Universitenvironment. The destruction of Pandora is caused by unobtanium, one of the natural wealth. Military people have plans to destroy Pandora and take the unobtanium Universi because it has a high price. It is because of the economical reason that leads it as American through the military people to destroy Pandora. This can be seen from Universit Parker's statements, the assistant of military leader. Parker : This is why we're here. Unobtanium. Because this little Universitas Brawijaya gray rock sells for twenty million a kilo. No other Universitas reason. This is what pays for the party. And it's what pays for your science. (Avatar, 2009, min 13:02 13:26) The statement above clearly portrays how expensive the unobtanium, because unobtanium costs twenty million a kilo. There is no other reason for them to Universitas Brawijava Universitas Brawijava Universi destroy Pandora besides to take the unobtanium excessive. Parker :

Their damn village is sitting right over the richest unobtanium deposit for a hundred klicks in any direction. Which sucks for them because they need to relocate. (Avatar, 2009, min. 48:02 - 48:12)

The statement above clearly portrays that Parker and the others want to destroy ersi Pandora because of unobtanium, if they attack all of Pandora side, they can besitas Brawijaya rich in a short time without any hard work. It is contradictory with Susilo's (2012) opinion that people have to be wise in using natural resources, they must apply the values that assure of the nature conservation in the future. Economy becomes a strong reason someone can do anything in terms of destroying nature. Economy Universitusually leads people to be greedy. They take the natural wealth in Pandora forestsitas Br Universit excessively. There are many components in the forest that are such essentials for human's life in a long timeas air, water, soil, and natural wealth. The excavation Universition unobtanium, one of the natural wealth, will contaminate all of them and sit Universitas Brawijaya Universitas Brawijaya Universitas decreasing their function in keeping the natural balance. Universitas Brawijaya **Universitas Brawijava** The relationship between the Na'vi and the environment in Pandora is closer than Universi human's in which human usually do not appreciate the existence of animals and Universitas Brain another side, technology can bring negative impacts for human and sitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Brawijaya Universitas Br environment. According to Duffy & Cunningham (1996, p. 180) that culture Universit creates the tool, but the tool can change the culture. People in the culture take Universithese tools from their culture to meet their goals, and thereby transform their sitas participation in the culture. From the previous theory, it can be inferred that technology is made by people to help them work easily, but technology changes Universi people to do negative things, like destroying Pandora to seize the unobtanium. It can be proven by Grace's statement to Parker. Parker : We built them school, we teach them English. But after, what? how many years? Relations with the indigenous are only getting worse. Grace : That tends to happen when you use machine guns on them. (Avatar, 2009, min 12:42-12:54) The dialogue above happens when Grace talks to Parker about the Na'vi who do not want to move from Pandora, in which the military people have built them a Universit school and also teach them English as the way to make a deal with them to take the unobtanium.
