This paper was be done the basic if on result not maximal of poverty alleviantion in Batu City. However, admitted that government had flowing various program that aimed to overcome poverty. More than, government struggle to mobilize the available resources by involuing more industrial sector and public roles. Industry involvement facilitated by government through technical instution as wise choice, cause indicated that poverty alleviation only beaccessible performed by involving all stakeholders. In this context tourisem become applicable and effective media to overcome poverty.

The theories used to reach the goal of poverty alleviation are theories of partnership, public-private partnership, poverty and public empowerment. In this research the write's utilizing the partnership theory as a base in poverty alleviation program concept, as for the results or impact of a cooperation the writer is using the theory of public empowerment as basic

This research using descriptive research with qualitative approach in performing description about Cooperation Inter Institutions In Poverty Alleviation. As reseach focus that is government struggle in overcome poverty in through tourism sector, Cooperation Batu City, and Cooperation impact in overcoming poverty in poor community Batu City.

From analysis result that be done, could be recognized cooperation in any forms could be occurred among institution related as stakeholders in poverty alleviation in Batu City. Engaged policies program that last result aimed to social economy improvement community of Batu City. The program namely emphasize on training and public empowerment, Bisade that also producing positive impact for community, from cooperation beetwen Government of Batu City with related private institution through human resources development, as well as product distribution to market demand need and realize employment chance also business oppor tunities and income improvement for community of Batu City.

Therefore subject could be recomended that, from cooperation inter institutions in overcoming poverty through tourism sector, that is government of Batu City with Kusuma Agrowisata, therefore the arrangement of the work plan can be done which consists of, to make the coordination forum and communication be effective, to encourage the assistance toward the society's non government organization, to development a cooperation network with the universities, to develop the pilot project of alleviating poverty by involving the stakeholder as well as by consolidation with the National Committee of Strategy for Alleviation Poverty, in order to ensure the integrating role of tourism with in the National Commite of Strategy Alleviation Poverty.
