

SUMMARY

Selly Novicadisa, 2014, **Effectiveness Regulations of Territory Kediri Number 7 Year 2010 About Retribution and License of Build The Building in Structuring The City of Kediri** (Studi Case Space Arrangement Sector of Department Pekerjaan Umum and Departmen of License Service, Advisors: (1) Prof. Dr. Soesilo Zauhar, MS and (2) Drs. Heru Ribawanto, MS

This research is meant to do because of there're a lot of critics in order to apparatus/employees which is make mistaken, inaccurate, inanppropriate and unfair to take the balance of ecologies in service forthe making the license of build the building. Kediri through Regulations of Territory Kediri Number 7 Year 2010 About Retribution and License of Build The Building, The Government of Kediri require for the appearing orderlinessin the activities of construction these days, especially in build and supplying buildings.

One of the construction activity in Kediri is structuring the building with the regulations to compulsory every building to have Lisence of Build The Building (IMB). The purpose is to make building of civilitation's build in appropriate structuring, fill the regulations, proper and keep the surroundings. The methode of this research using descriptive qualitative. The researcher use methode of gathering datas through interview, observation and documents.

Based on the result of the observation and the connection of Kediri through Regulations of Territory Kediri Number 7 Year 2010 About Retribution and License of Build The Building, issue of Lisence of Build The Building (IMB) is made for the civilitation who want to build the building or to enlarge their area. According to the result, it can be said that the side of Department of License Service and Space Arrangement Sector of Department Pekerjaan Umum of Kediri still less in caring or awareness about the real situation of city which is the outcome of regulations of territoty already succees and effective or still unclear.

The researcher suggest for the Department od License Service ought to give more socialitation to civilitation who want to get the Lisence of Build The Building (IMB) about the minimal standart in the form of regulations and procedure that prescript in service proccess of IMB. And than, listen to critics and rekomendasi from civilitations, those things are important to encourage efectiveness service to be better.

Key word : Lisence of Build The Building (IMB), Efectiveness and Structuring City Building
