## SUMMARY

Dwi Puspita Novitasari, 2016, **“Public Private Partnership Implementation of Infrastructure Construction for Improving Accessibility and Increasing Local Economic Growth (Study on Rantau Pulung Sub District, East Kutai Regency)”**, Dr. Moch Saleh Soeaidy, MA, Drs. Stephen Panirengu, MAP.

Public Private Partnership (PPP) is a good media in order to increase the social-economy. This partnership provides many advantages and convenience for the company itself, government and communities. If communities only relies to the government to provide a good service provision, it was difficult to achieve because the budget spent are huge, both for development budget and for maintenance budget. With the cooperation between the Local Government and the private sector, the quality and quantity of public facilities will be improved. Besides, this partnership is expected to help the government's role in decreasing inequalities of income and job opportunities in society.

PPP scheme infrastructure provision project should continue to develop as an alternative infrastructure financing in Indonesia, because PPP scheme allows the government to attract private sector participation, both domestic and abroad. The government in the provision of public infrastructure is not always able to supply its communities' need, it is necessary to engage the private sector's role to support the government to implement public obligations. Thus, the burden of the government investment cost decreases, utilization assets will be more efficient, and allocation of specific risk can be transferred to private sector.

The result of this research shows the development using the PPP scheme. The government in the provision of public infrastructure is not always able to provide its own necessity. Then, this case requires the participation of private sectors in order to support the government's implementation of its public obligations. Thus, the burden of the cost of government investment decreases, the use of government assets is more efficient, and the allocation of specific risk can be transferred to private sector.

## PREFACE

Praise to Allah SWT, who has given us grace and mercy, so the author is able to finish the undergraduate thesis entitled “Public Private Partnership Implementation of Infrastructure Construction for Improving Accessibility and Increasing Local Economic Growth (Study on Rantau Pulung Sub District, East Kutai Regency).” The researcher tried to pour the love of science in writing this undergraduate thesis. Some knowledge and experience were gained while spending quite a lot of time to enhance this research. Fatigue and long time were paid enough with the results achieved.

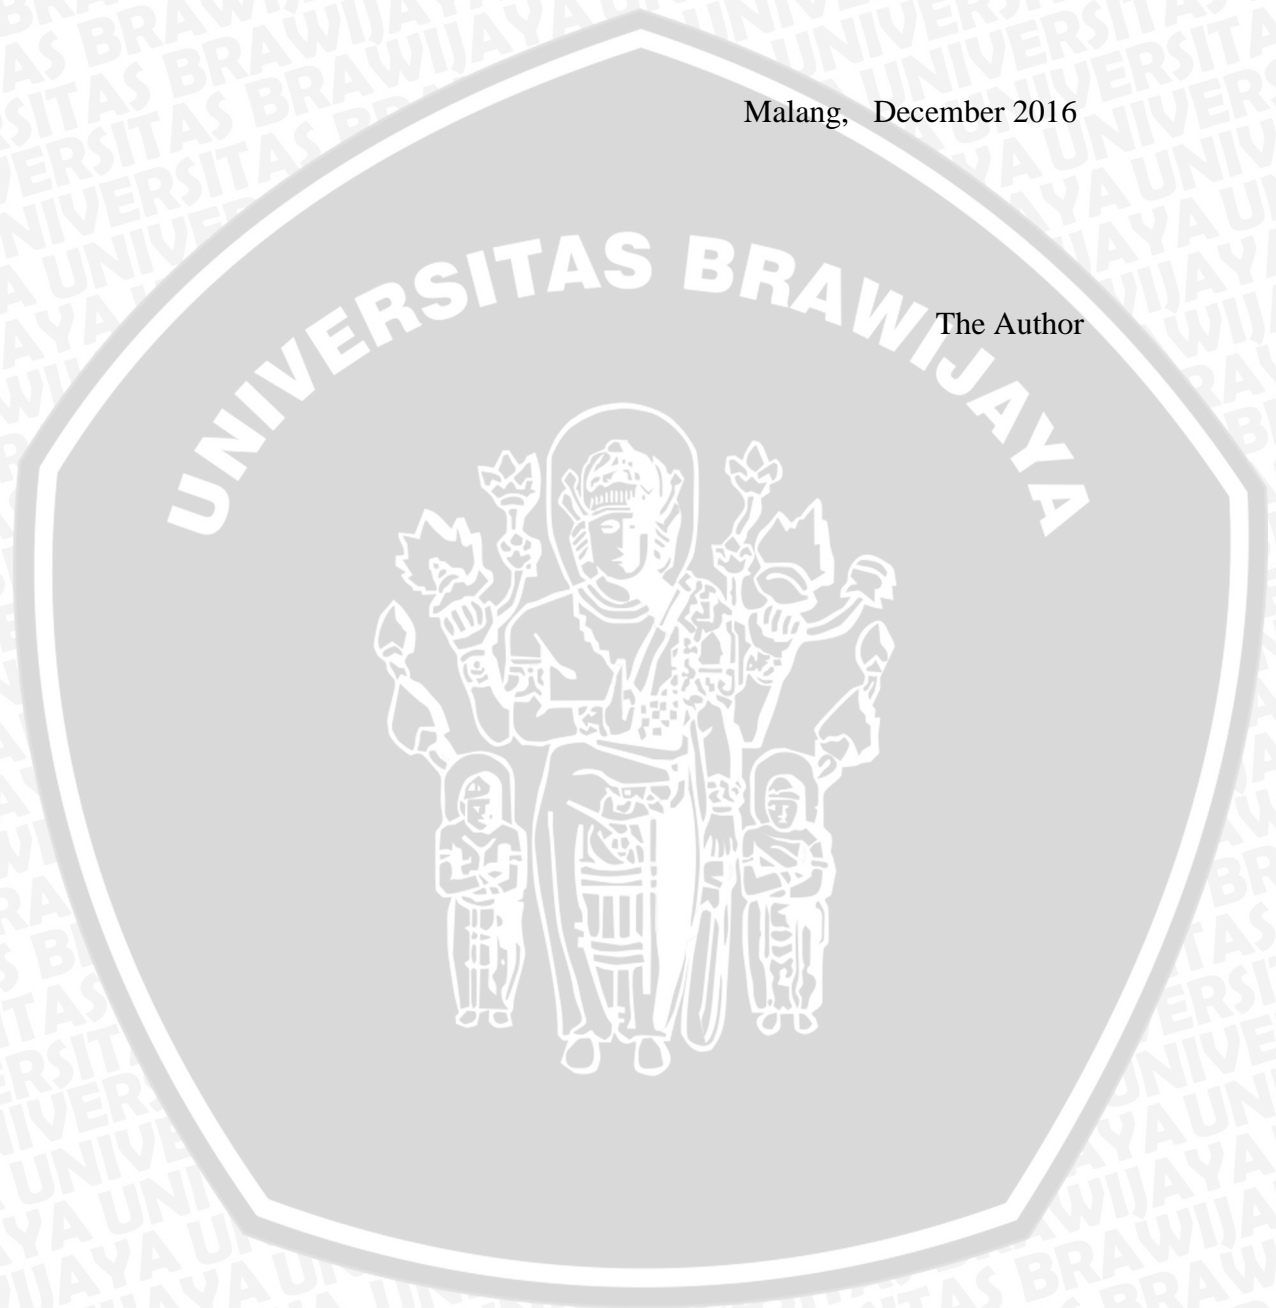

Many discussions are conducted by the researcher to some colleagues, seniors even professors to conduct this research. There are several difficulties to access literature and apply the formula. The researcher feels greatly helped by the presence of several people in this study. Therefore, she would like to thank some people as follows:

1. Dr. Moch Saleh Soeaidy, MA and Drs. Stefanus Panireng, MAP who are patient to provide directions and advices to the researcher that she was able to accomplish this task
2. my parent, my old sister, my old brother and my family that always support, prayers and motivation for me. Never gonna change my love for you all
3. PT. Kaltim Prima Coal External Sustainable Development division (ESD) and Dinas Pekerjaan Umum Kabupaten Kutai Timur in Bina Marga sector that are very helpful throughout this study
4. my beloved classmates (International class 2011) Cindy, Vidya, Lingling, Ika Laila, Fitri, Emey, Putri, Ika Yuni, Tika, Nanda, Zein, Ilham, and Manda. Thanks to be the part of my life guys
5. my best partner Mbarep Ngudi Sasmito, thank you for being my everything until now and always support researcher, and
6. thanks to my housemates Amalia, Mega, Armel, Mbak Au who are really kind to always support the researcher.

Lastly, the researcher hopes to gain some suggestions and critics to improve the quality of this research. The researcher hopes that this undergraduate thesis will give benefits and contributions to the future research.

Malang, December 2016

The Author
