iaya Universitas Bray Universitas Brav **KATA PENGANTAR** Universita Kurikulum 2013 dirancang untuk menyongsong model pembelajaran niversitas Brav Universabad 21. Peran Bahasa Inggris iniversitas Bray Universidalam model pembelajaran ini menjadi sangat sentral mengingat lebih niversitas Universbanyak sumber belajar dalam Bahasa Inggris dibandingkan dengan niversitas Brav sumber belajar dalam semua bahasa lainnya. ersita Makin datarnya dunia dengan teknologi informasi dan komunikasi niversitas Brav Universmenyebabkan pergaulan tidak dapat lagi dibatasi oleh batas-batas niversitas Brav versnegara. Kurikulum 2013 menyadari peran penting Bahasa Inggris niversitas Universtersebut dalam menyampaikan gagasan melebihi batas negara niversitas UniversIndonesia serta untuk menyerap gagasan dari luar yang dapat er dipergunakan untuk kemaslahatan bangsa dan negara. Dengan demikian kompetensi lulusan pendidikan menengah yang dirumuskan sebagai mampu menjadi cerminan bangsa yang berkontribusi aktif dalam pergaulan dan peradaban dunia dapat tercapai. Sejalan dengan peran di atas, pembelajaran Bahasa Inggris untuk Pendidikan Menengah Kelas XII yang disajikan dalam buku ini disusun untuk meningkatkan kemampuan berbahasa. Penyajiannya adalah dengan menggunakan pendekatan pembelajaran berbasis teks, baik lisan maupun tulis, dengan menempatkan Bahasa Inggris sebagai wahana komunikasi. Pemahaman terhadap jenis, kaidah dan konteks suatu teks ditekankan sehingga memudahkan siswa menangkap makna yang tersurat dan tersirat dalam suatu teks; juga untuk menyajikan gagasan dalam bentuk teks yang mudah dipahami makna kandungannya dan diapresiasi keindahan pilihan rangkaian katanya. Sebagai bagian dari Kurikulum 2013 yang menekankan pentingnya keseimbangan kompetensi sikap, pengetahuan dan keterampilan, kemampuan berbahasa Inggris yang dituntut dibentuk pembelajaran berkelanjutan: dimulai dengan meningkatkan kompetensi pengetahuan tentang jenis, kaidah dan konteks suatu teks, dilanjutkan jaya jaya Universitas Brawijaya Universitas Braw Universitas Brawijava Universitas Brawijava Universitas Brawijava jaya

ASSOCIATING Work in groups. Find two captions. Discuss with your friends by focusing on three things: 1) whether they are good, 2) what messages they express, and 3) what grammar is used. A note to remember: There are several criteria for a good caption. A good caption clearly identifies the subject of the picture without detailing the obvious. It is succinct, establishes the picture's relevance to the picture, provides context for the picture, and draws the reader into the message. So related to the structure of a caption, it can be written in the form a word(s), a phrase(s) or a sentence(s). A reptile is an animal Universita that crawls, though some prefer to swim. Reptiles usually have Universita scales on their bodies, like fish, but they breathe through lungs Universita as people do. Reptiles are cold-blooded. This means that the University temperature of their blood changes when the air temperature changes. Snakes, turtles, and lizards are all reptiles. So were the universitas Brav Universita ancient dinosaurs. (Taken from Charlie Brown's Cyclopedia. Volume 2. 1990. Animals through the Ages: From Alligators to Zebras) TEXT 2 Huge reptiles called Dinosaurs lived on earth about 180 million years ago. They flourished and ruled the earth for more than 120,000,000 years. But today we can't see even a single one of them because all of them died out about 60 million Universita years ago. Why such strong and flourishing creatures should suddenly Universitas Brav **Universitas** Universita disappear completely is a question that still puzzles the scientists Universitas Brav Universita today. The most probable explanation is the climate of the earth Universita changed too much about 60 million years ago for the dinosaurs to niversitas Brav Universita continue living. Universitas BravThe huge sized reptiles called Dinosaurs existed in a great Universitas Brav University variety of sizes. Most were 25 to 30 feet long and weighed from Universita five to ten tons. However, zebras appear to be too unpredictable and flighty to fully domesticate, despite the best efforts of intrepid riders. Universitas Bray Instead, some people breed zebra hybrids, crossing full blooded zebras with horses and other equids to produce more easily trained Universitas Bray and handled animals which retain the characteristic zebra stripes. There are several different species of zebra, but all of them are in the same genus, Equus, which they share with horses. Like other equids, zebras are odd-toed ungulates with muscular bodies which are built for running. Zebras were among the earliest animals to split from the original equids, along with asses, and as a result, they have had an extended period of time to adapt to the unique challenges of the African landscape. These animals have very stout, muscular bodies which are designed for immense speed and strength. When threatened, a zebra can choose to run, often choosing a zig-zagging pattern to distract the predator, or they can fight, using powerful jaws and heavy hooves to attack their enemies. Like asses, zebras have tufted tails, and they also have short, upright manes of coarse hair, along with unusually large ears which give these animals a very good sense of hearing. Zebras are herbivores, eating grass, foliage, and various shrubs. Depending on the species, a zebra may be adapted more for the open plain, or for more heavily wooded and mountainous areas. In all cases, zebras are very social animals, living in large herds which are typically overseen by a single stallion. A zebra's gestation period is 13 months, typically producing a single foal Universiwhich may join the herd when it reaches adulthood, or strike out on its own to find another group of zebras. The stripes of the zebra appear to have several functions. In about 4 to 5 weeks, the female will lay her eggs. Normally, you will see her digging in the laying box and laying the eggs in pairs. It will be easy to tell she has laid the eggs, particularly since she will be much thinner. 5.Place the eggs in the incubation medium. Remove them from the laying box and be careful not to rotate or jiggle the eggs. After 24 hours of being laid, the embryo inside attaches itself to the side wall of the egg.
