

## DAFTAR SINGKATAN

|                |  |
|----------------|--|
| CAM            | : chemotactic adhesion molecule                      |
| cAMP           | : cyclic adenosine monophosphate                     |
| CRP            | : C-reactive protein                                 |
| ERK1/2         | : extracellular signal-regulated kinase              |
| ET             | : endotelin  |
| ICAM           | : intercellular adhesion molecule                    |
| IDL            | : intermediate density lipoprotein                   |
| IL             | : interleukin  |
| JAK            | : janus kinase                                       |
| LDL            | : low density lipoprotein                            |
| MAPK           | : mitogen-activated protein kinase                   |
| MCP            | : monocyte chemoattractant protein                   |
| MCSF           | : macrophage colony stimulating factor               |
| NF- $\kappa$ B | : nuclear factor kappa B                             |
| NO             | : nitric oxide                                       |
| PJK            | : penyakit jantung koroner                           |
| STAT3          | : signal transducer and activator of transcription 3 |
| TNF            | : tumor necrosis factor                              |
| VCAM           | : vascular cell adhesion molecule                    |
| VLDL           | : very low density lipoprotein                       |
