## BAB I PENDAHULUAN

1.1 Latar Belakang ................................................................. 1
1.2 Rumusan Masalah ............................................................. 2
1.3 Tujuan Penelitian .............................................................. 2
1.4 Kegunaan ............................................................................... 2
1.5 Kerangka Pikir ...................................................................... 3
1.6 Hipotesis ................................................................................. 4

## BAB II TINJAUAN PUSTAKA

2.1 Tepung Porang ........................................................................ 5
2.2 Nugget ....................................................................................... 7
   2.2.1 Komposisi Nugget ................................................................. 7
2.3 Daging Ayam ............................................................................. 11
2.4 Bahan Pengikat .......................................................................... 11
2.5 Bahan Pengisi ............................................................................ 12
2.6 Pengukusan ................................................................................. 13
2.7 Sifat Kimia ................................................................................ 13
2.8 Organoleptik ............................................................................. 14

## BAB III MATERI DAN METODE PENELITIAN

3.1 Lokasi dan Waktu Penelitian ................................................. 15
3.2 Materi Penelitian ................................................................. 15
   3.2.1 Nugget ayam ......................................................................... 15
   3.2.2 Tepung Porang ....................................................................... 15
   3.3.3 Alat dan Bahan ...................................................................... 16
3.3 Metode Penelitian ................................................................. 16
   3.3.1 Rancangan Percobaan ............................................................. 16
   3.3.2. Cara Pembuatan Nugget.......................................................... 17
   3.3.3.3 Formulasi Pembuatan Nugget .................................................. 18
3.4 Variabel Pengamatan ............................................................ 18
   3.4.1 Uji Kadar Air ........................................................................... 18
   3.4.2 Uji Protein .............................................................................. 18
   3.4.3 Uji Lemak ............................................................................... 19
   3.4.4 Uji Rasa ................................................................................ 19
   3.4.5 Uji Tekstur ........................................................................... 20
3.5 Analisis Data ............................................................................ 20
3.6 Batasan Istilah ........................................................................ 20
