

## DAFTAR PUSTAKA

Bannantine, Julie A; Jess J. Comer; James L. Handrock. 1990, "Fundamental of Metal *Fatigue Analysis*", New Jersey: Prentice—Hall, Inc.

Broek, David, 1982, "Elementary Engineering Fracture Mechanics", USA:Kluwer Boston.Inc

Bretz, P.E. *et al.* 1984. "Fatigue Crack Growth Behaviour of 7XXX Aluminum Alloys under Simple Variable Amplitude Loading." J. Stanford (Ed). *Fracture Mechanics: Fifteenth Symposium*. ASTM STP 833. Philadelphia: American Society for Testing and Materials.

Cook. Robert, Malkus. David, Plesha. Michael, Witt. Robert. 2002. "*Concept and Applications of finite Element Analysis*". Denver : John Wiley & Sons.

Dieter, G.E., 1988, "Mechanical metallurgy", SI metric edition, McGraw-Hill, ISBN 0-07-100406-8.

E.Hatch, 1984 "Aluminium - Properties and Physical Metallurgy", American Society for Metals, Ohio: Metals Park. ISBN 0-87179-176-6

Hoeppner, D.W., 1996, "Industrial Significance of *Fatigue Problems*", ASM Handbook, *Fatigue and Fracture*, vol. 19, p 1, 1996

Ling MR, Schijve J. Fractographic analysis of crack growth and shear lip development under simple variable-amplitude loading. *Fatigue Fract Eng Mater Struct* 1990;13(5):443–56.

P, Anindito, 2010, "Evaluasi Faktor Intensitas Tegangan Pada Ujung Retak dengan Lubang Penghambat Rambat Retak" Jurnal Rekayasa Mesin Vol.1, No. 1 Tahun 2010 : 1-7

Ralph I, Stephen, *et al.* 2000, "Metal *Fatigue In Engineering*" Canada: Jhon Willey & Sons. Inc

Sarchamy, *et al.* 1998. *Effect of Periodic Tensile Overload on Fatigue Crack Behaviour in 2024 – T351 Alloy in an Aggressive Enviroment.*

Shanyavskiy, A.A ; Burchenkova, L.M. 2011. *Mechanism for fatigue striations as formed under variable negative R-ratio in Al-based structural alloys.* International Journal of Fatigue 50 (2013) 47–56

Suresh, S., 1988, “*Fatigue of materials*, 2nd edition”, Cambridge university press, ISBN 0-521-57847-7.

Tsukuda, H. et al. 1996. ”Transient *Fatigue* Crack Growth Behaviour Following Single Overloads at High Stress Ratios.” *Fatigue and Fracture of Engineering Materials and Structures*, 19 (7): 879 – 891.

W, Bestenbostel 2010 “The Appearance Of *Fatigue Striations* In The SEM”, Munich, Germany EADS Innovation Works 81663

Y. Murakami and K.J. Miller., 2007, “What is *fatigue* damage? A view point from the observation of low cycle *fatigue*”, *International journal of fatigue*, 27 (2007) pp. 991-1005
