LIST OF ABBREVIATIONSxiii

CHAPTER 1 INTRODUCTION 1

1.1 Introduction..... 1

1.2 Problem Statement. 2

1.3 Objectives..... 3

1.4 Scope of Projects..... 3

CHAPTER 2 LITERATURE STUDY 4

2.1 Introduction..... 4

2.3 Antenna Parameter..... 5

 2.3.1 VSWR (Voltage Standing Wave Ratio..... 5

 2.3.2 Return Loss..... 6

 2.3.3 Bandwidth 6

 2.3.4 Antenna Radiation Pattern 8

 2.3.5 Gain Antena 8

 2.3.6 Antenna polarization..... 9

2.4 Microstrip Antenna 10

2.5 Advantages and Disadvantages..... 12

2.6 Microstrip Antenna Parameter..... 13

 2.6.1 Resonant Frequency..... 13

 2.6.2 Bandwidth 14

2.7 EBG.....	14
2.7.1. Types of EBG Structure.....	15
2.7.2 Planar EBG Structures	17
2.8. Methods of Analysis EBG Structure.....	19
2.8.1 Transmission Line Model	19
2.8.2 Numerical modeling of EBGs	20
2.9. Previous Work.....	21
2.9.1 2x1 microstrip array antenna with ebg structure for dual band and enhanced bandwidth.....	21
2.9.2. Enhancement of Microstrip Monopole Antenna Bandwidth by Using EBG Structures.....	23
2.9.3 On the Bandwidth Enhancement of Patch Antenna Using EBG/AMC Structures.....	26
CHAPTER 3 METHODOLOGY.....	29
3.1 Introduction.....	29
3.2 Project Assesment.....	29
3.3Project Design.....	30
3.3.1 Microstrip Antenna	32
3.3.1 EBG (Electromagnetic Band Gap).....	34
3.3.3 Antenna with EBG structures	38
3.4 Design Using CST Software.....	38
3.5 Antenna Fabrication.....	39
3.6 Measurement	39
CHAPTER 4 RESULT AND DISCUSSION.....	40
4.1 Introduction.....	40
4.2 Microstrip patch antenna.....	40
4.2.1 Return loss of antenna.....	40
4.2.2 Bandwidth	41
4.3 EBG Structure.....	42
4.4 Microstrip patch antenna with EBG.....	43
4.4.1 Return loss , S11	43
4.4.2 Bandwidth	43

4.5 The Prototype.....	44
4.6 Data Comparison.....	45
4.6.1 Comparison of Simulated Microstrip antenna with and without EBG..	45
4.6.2 Comparison of Measured Antenna with and Without EBG.....	46
4.6.3 Comparison of Simulated and Measured Antenna Without EBG.....	47
4.6.4 Comparison of simulated and measured Antenna With EBG.....	49
4.6.5 Comparison of Simulated and Measured EBG	50
4.7 Directivity.....	51
4.8 Gain.....	52
4.9 Table of Summary	53
4.10 Summary.....	54
CHAPTER 5 CONCLUSION & RECOMMENDATION.....	56
5.1 Introduction.....	56
5.2 Conclusion	56
5.3 Recommendation.....	57
REFERENCES.....	58

LIST OF TABLE

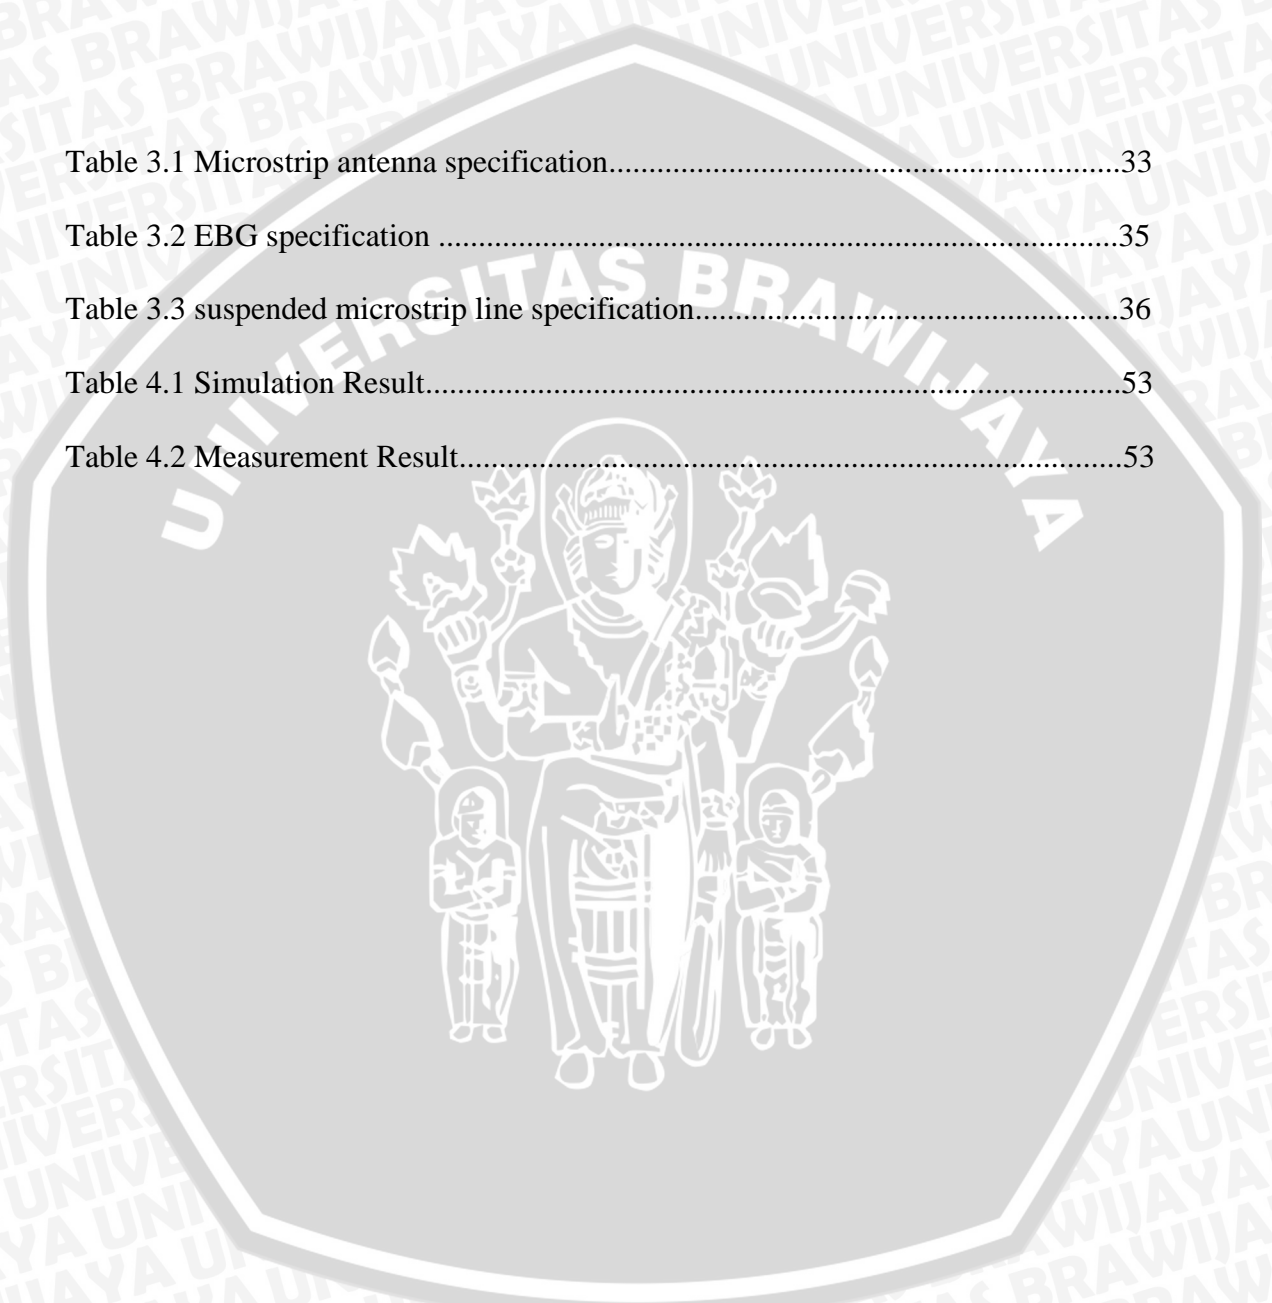

Table 3.1 Microstrip antenna specification.....33

Table 3.2 EBG specification35

Table 3.3 suspended microstrip line specification.....36

Table 4.1 Simulation Result.....53

Table 4.2 Measurement Result.....53

LIST OF FIGURE

Figure 2.1 Illustration of return loss [6]6

Figure 2.2 Antenna Radiation pattern [7]8

Figure 2.4 Parts of microstrip antenna [6]10

Figure 2.3 General picture of polarization [7]10

Figure 2.5 Shape of microstrip antenna [6]11

Figure 2.6 Three dimensional EBG Structures [18]16

Figure 2.7 Two dimensional EBG structures [19]17

Figure 2.8 One dimensional EBG structure [18]17

Figure 2.9 Classification of Planar EBG Structures18

Figure 2.10 (a) Microstrip Line (b) Electric Field Lines [8]19

Figure 2. Dispersion analysis in CST MWS (a) and HFSS (b). The unit cell setup on the left, the applied boundary conditions with the irreducible Brillouin zone on the right. [31]20

Figure 2.12 Conventional rectangular microstrip antenna [21].....22

Figure 2.13 (a) Rectangular microstrip array antenna with slotted EBG lattice (b) Geometry of EBG slot structure [21]22

Figure 2.14 Experimental return loss versus frequency of (a) RMSA (b) TRMSAA and TRMSAAEBG [21]	23
Figure 2.15 Steps toward the final design of proposed umbrella shaped monopole patch antenna.[22]	24
Figure 2.16 S11 versus frequency for various design options. (a) Simulated results and (b) comparison between simulation and measurement for the proposed antenna. [22]	24
Figure 2.17 The proposed antenna with embedded EBG: (a) circular EBG, (b) square EBG, (c) side view of EBG structure, (d) fabricated radiator monopole antenna, and (e) ground plane on back of the substrate. [22]	25
Figure 2.18 Transmission coefficients s_{21} versus frequency for different EBG design options. [22].....	25
Figure 2.19 Comparison between measured and simulated reflection coefficient for (a) umbrella monopole antenna with embedded circular EBG patches.(b) umbrella monopole antenna with embedded square EBG patches. [22]	26
Figure 2.20 Manufactured prototypes: a) Patch antenna, b) Patch antenna–EBG, c) Planar AMC [23]	27
Figure 2.21 Resonances to be coupled in order to achieve bandwidth enhancement. Schematic of suspended line above EBG surface (top view) [23]	27
Figure 2.22 Phase of the reflection coefficient on the AMC surface (simulated). Reflection phase simulation set-up, [23]	28
Figure 2.23 Phase of the reflection coefficient on the AMC surface (simulated). Reflection phase simulation set-up, [23]	28
Figure 3.1 Project's flow chart	31
Figure 3.2 Geometry of microstrip antenna	32

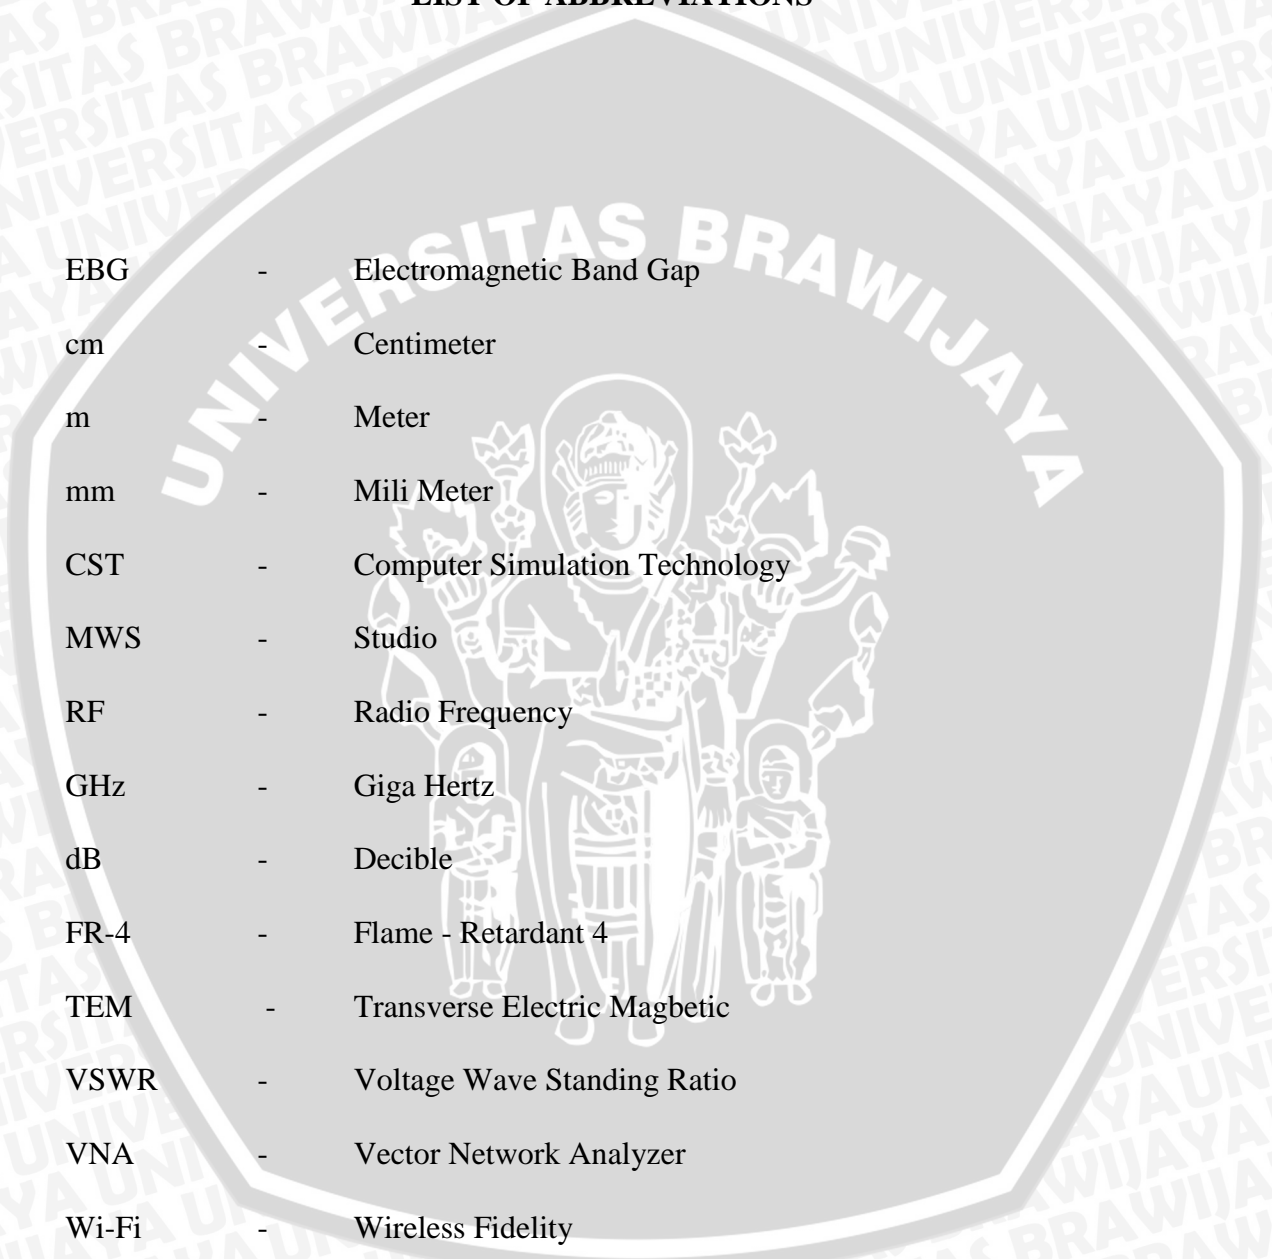

Figure 3.3 Geometry of Electromagnetic Band Gap (EBG) cell	35
Figure 3.4 Geometry of suspended microstrip line (a) Top view (b) side view (c) bottom view.....	37
Figure 3.5 Geometry of antenna with EBG structure	38
Figure 4.1 simulated S_{11} parameter	41
Figure 4.2 simulated bandwidth of microstrip patch antenna	42
Figure 4.3 Simulated 1 x 3 EBG S_{21} parameter	42
Figure 4.4 Simulated Antenna with EBG structure	43
Figure 4.5 Bandwidth of microstrip patch antenna with EBG	44
Figure 4.6 Front side of fabricated microstrip patch antenna (a) without EBG (b) without EBG	44
Figure 4.7 Fabricated EBG (a) top view (b) bottom view.	45
Figure 4.8 Return loss Comparison of Simulated Microstrip antenna with and without EBG	46
Figure 4.9 Bandwidth Comparison of Simulated Microstrip antenna with and without EBG.....	46
Figure 4.10 Return loss Comparison of measured Microstrip antenna with and without EBG	47
Figure 4.11 Bandwidth Comparison of measured Microstrip antenna with and without EBG	48
Figure 4.12 Return loss comparison between measured and simulated antenna without EBG	49
Figure 4.13 Return loss comparison between measured and simulated antenna with EBG.....	50
Figure 4.14 S_{21} comparison between simulated and measured EBG structured.....	51

Figure 4.15 Directivity of microstrip patch antenna without EBG51

Figure 4.16 Directivity of microstrip patch antenna without EBG52

Figure 4.17 Gain of microstrip patch antenna (a) without EBG (b) with EBG52

LIST OF ABBREVIATIONS

EBG	-	Electromagnetic Band Gap
cm	-	Centimeter
m	-	Meter
mm	-	Mili Meter
CST	-	Computer Simulation Technology
MWS	-	Studio
RF	-	Radio Frequency
GHz	-	Giga Hertz
dB	-	Decible
FR-4	-	Flame - Retardant 4
TEM	-	Transverse Electric Magbetic
VSWR	-	Voltage Wave Standing Ratio
VNA	-	Vector Network Analyzer
Wi-Fi	-	Wireless Fidelity
