

CHAPTER V

CONCLUSION

There are 2 section that will be explained in this part. The first section is the conclusion that related to the research finding. Then, the second is suggestion for the teacher, the students, and the future researcher.

5.1 Conclusion

Based on the previous chapter, findings of the research result. It shows that students are interested using English movie to improve their listening skill and more motivated to learn listening. They also agreed that they got easier to learn listening using English movie. Moreover, they supported the idea on using English movie as a listening media to improve their listening skill.

To conclude, the students give positive responses on using English movie as a listening media to improve their listening skill. The students of eleventh grade at SMKN 10 Malang support this idea and agreed that English movie is a profitable tool as a listening media. It can be concluded that students' perception about the use of English movie to improve listening skill is positive.

5.2 Suggestion

Based on conclusion above, the researcher gives suggestion to the SMKN 10 Malang, the teacher, the students, and the future researcher.

5.2.1 SMKN 10 Malang

The result of the research shows the students like and interested on using English movie to improve their listening skill. It is suggested to the school to facilitate the teachers and the students to conduct collaborative teaching and learning.

5.2.2 The teacher

The researcher suggest that the teacher should be more creative in utilizing the teaching media especially English movie. English movie can be used by teachers as a complementary tool in teaching process. It can provide learning support. While English movie can be used to improve speaking skill, it can be used to improve listening skill. The English teacher needs to improve teaching strategy by maximizing the use of a various technique, for example, English movie media and viewing technique of English movie. They must be creative in delivering the materials in/out the class.

5.2.3 The students

The eleventh-grade students of SMKN 10 Malang 2019/2020 should be more active and concentrate especially when they are on listening activity because listening need high concentrated for students. Then, to make the students enjoy learning listening, it is suggested to use English movie to improve their listening skill.

5.2.4 The Future Researcher

The researcher realize that this study has not been perfect yet. Further research is really needed to obtain the development of this media. Based on the finding in chapter IV, the future research needs to modify the English movie. Students prefer to watch film than short movie in learning listening. Perhaps this finding can be reference for further research. The researcher suggested to the future researcher to use online questionnaire in order to collect the data because online questionnaire has so many advantages for the study.
